

Dan Fitz

Front-end Developer

Education

Web Development Immersive Certificate, Juno College of Technology (formerly HackerYou)

Jul - Sep 2019

Honours B.A. in Philosophy, University of Toronto, St. George

2012 - 2015

3.93 GPA

Profile

When I got into software development, I knew I had found the perfect place where I could put my critical thinking skills to full use. Coming from a philosophy undergrad, my greatest skill has always been the ability to think logically. Given the logic expected in coding, being a developer makes me feel like the best version of myself. As a lifelong learner, my current goal is to learn full-stack, working and growing with a company that is building stuff that makes the world a better, more interesting place.
